

5 Outubro 355

Rehabilitation in the heart of Lisbon gives way to luxury housing

In the space left vacant by a former kindergarten, on Avenida 5 de Outubro, a building is being developed that will house an exclusive collection of 18 luxury flats, including a penthouse duplex with five bedrooms and 303 m² on the top two floors. Engexpor is helping to give new life to this emblematic development by providing the services of construction management

The 5 Outubro 355, located a few meters from the site of the former Feira Popular, consists of 10 floors above ground and an underground car park with charging stations for electric vehicles.

With modern architecture and noble materials, the flats were designed with bedrooms and social areas located on the perimeter to maximize natural light. Balconies and terraces (two large areas in the penthouse), with unobstructed views over the capital, are also a differentiating factor of this project.
