

Algarve Shopping

Open-air design inspired by the architecture of the region

With a strong commercial, recreational and cultural component, combined with unique architecture based on the region's characteristics, Algarve Shopping is an important center for the dynamization of the Albufeira region, one of the most important tourist and commercial areas in the Algarve.

Inaugurated in 2001, it was Sonae Sierra's first open-air project. Engexpor carried out the project and construction management, as well as the coordination and installation of shopkeepers in the shopping center.
