

Amoreiras Shopping Center

Renovation of the first shopping centre in Portugal modernises Lisbon landmark

Twenty-seven years after its opening in 1985, the Amoreiras Shopping Centre underwent renovation works, which allowed the first mall to open in Portugal to remain a prime shopping destination for Lisbon residents.

The renovation works coordinated by Engexpor primarily involved the renovation of the food court, modernisation of toilet facilities, replacement of the air conditioning system and installation of false ceilings and skylights, thus offering visitors a more comfortable, welcoming experience.

The opening of the Amoreiras Shopping Centre in Lisbon, the first mall to be built in Portugal, offering an experience previously unknown to many shoppers, represented a milestone for the city of Lisbon and the country in general. The Amoreiras Shopping Centre remains to this day one of the most iconic shopping venues in Lisbon, standing out for its innovative character, irreverent design and designer shops, including some of the most widely renowned national and international brands.

Part of a series of office and residential buildings that received the Valmor Prize and Municipal Architecture Award in the 1990s, the Amoreiras Shopping Centre boasts more than 200 shops, as well as the Amoreiras 360° Panoramic View Restaurant, which affords one of the best views of the city.
