

Aparthotel Broadway

Superior quality apartments on the Matosinhos waterfront

The tourism project is under construction in one of the noblest locations in Matosinhos and will provide 108 apartments, spread over 4 floors above ground. Engexpor is responsible for managing the work.

With approximately 7,000 m² of gross construction area, the Broadway aparthotel also has 2 underground floors for parking, with a capacity for 50 spaces.

It stands out on the northern edge of the city with its modern architecture and large balconies facing the sea, offering various services and leisure facilities, including a bar, restaurant, gym, spa, and a garden patio.

Located in one of the most distinct locations in Matosinhos, the project owes its name to the road where it is located. Broadway is the name of the pedestrian path that crosses perpendicularly the regular route of the Matosinhos-Sul area. It was built as part of the execution of the Reconversion Plan designed by architect Siza Vieira for this area of the city, connecting it to the City Park of Porto and on the seafront.
