

Aqua Portimão

Largest shopping center in the western Algarve

Designed by Sua Kay Architects, the development stands out for its modern architecture, high-quality construction and the diversity of its range of stores, which combine local businesses and big international chains, some of which made their debut in the Algarve when the shopping center opened.

Inaugurated in 2011, Aqua Portimão had its project and construction managed by Engexpor, together with the coordination and installation of shopkeepers.
