

Atlantis Building

Four glass facades ensuring natural light and landscapes

Located in the main artery of 'Parque das Nações', the D. João II Avenue, next to the Vasco da Gama shopping center, the Atlantis Building is a great example of qualified offer at the newest and foremost dynamic areas of the city of Lisbon. It provides an office area of 8,433 sqm distributed between 7 floors, a shopping space on the ground floor, as well as 3 underground floors for parking, with a capacity to hold 282 vehicles.

the architectural endeavor was undertaken by Hartmann Associados, exhibiting an highly flexible internal structure, where aesthetic and comfort values come together with the most demanding technical and technological requirements. Solar exposure is another distinctive feature of this building, benefiting from an abundant natural light due to its 4 glass facades.

Always active in Parque das Nações, Engexpor was responsible for managing both the project and the construction of the Atlantis Building.
