

Bossa Nova Mall

New concept prioritises convenience and quality

Engexpor was responsible for managing the Retailers Committee in order to coordinate the installation of 47 shops and restaurants at the new Bossa Nova Mall, a modern, prestigious shopping centre in Rio de Janeiro.

Located on the Guanabara Bay, the Bossa Nova Mall affords a remarkable view of Mount Corcovado and Christ the Redeemer. However, this outstanding view is not its sole attraction, as convenience and comfort are also offered to central and south Rio dwellers and the many tourists that visit the “Wonderful City”. Part of a complex that also includes a hotel, a congress centre and a business centre, the Bossa Nova Mall is the only shopping centre connected to an airport – the Santos Dumont Airport.

The mall also stands out for its two exclusive restaurants: an innovative restaurant on the ground floor, featuring a meat buffet and a selection of artisanal beers; and an exclusive Asian restaurant, located on the top floor, which boasts a unique design and offers a dazzling view of the city.
