

Central Office

Modern offices at the youngest corporate hub of Lisbon

Located in the main Avenue of 'Parque das Nações', close to the Oriente subway station and the Vasco da Gama Shopping Center, the Central Office highlights the urban scenery of one of the most modern corporate hubs in Lisbon.

Of contemporary architecture, the modern building comprises 14 office floors which offer their occupants panoramic views of the surroundings. The property also has an underground parking area, with a total of 20,600 sqm of gross construction area.

The project management and construction relied on our experience in the office building industry in an area where we have been performing since the beginning of its rehabilitation.
