

## Dolce Vita Tejo

Destination of excellence for entertainment and leisure

Inaugurated in 2009, the Dolce Vita Tejo has since invested heavily in implementing the innovative shopping resort concept, which aims to transform the shopping mall into a leisure and entertainment destination to reinvent the visitor experience by creating welcoming spaces and a range of cultural, sports and leisure activities for families.

Featuring noteworthy architecture, the shopping mall, with 122,000 m<sup>2</sup> GLA, brings together an extensive selection of domestic and international brands and exclusive offers for families. Its main attractions include the largest covered square in Europe, an outdoor area with a 130 m<sup>2</sup> screen suspended over a garden; Kidzânia, a theme park offering fun and learning where “the little ones can play at being adults,” trying over 60 professions, which has captured the imagination of children from around the country; and the Lego Fun Factory, a free leisure space with the creative richness of the Lego universe.

Engexpor was the company responsible for managing the project and construction, alongside the storeowners’ community.
