

Fernão Magalhães Tower

A striking image in high quality offices

At the heart of 'Parque das Nações', the 15 floors of the Fernão de Magalhães Tower glass facade define the majestic profile of this office building located in D. João II Avenue.

Engineered by Jean Wilmotte, the undertaking distinguishes itself by its strong external profile and high quality, efficiency and comfort standards. The glass facade provides light and a privileged overview of the river and the 'Parque das Nações' on, virtually, every floor.

The Fernão de Magalhães Tower also boasts stores on its ground floor and a private parking area with 293 spaces.

Always dynamic in the 'Parque das Nações', once again we have imprinted our presence in a reference venture by carrying out the project's management and construction.
