Flower Tower Camellia

Residential project with high quality standards

Engexpor is monitoring the development of a new residential building in Leça da Palmeira, being in charge of the project and construction management.

With a total of 134 flats and 9 retail spaces on the lower floors, the project includes a total buildable area of 16,903 m^2 , of which almost 10,000 m^2 are for residential construction. Two underground floors (5,772 m^2) will also be built for parking.

This building is part of the set of plots belonging to Nexity Portugal on land located next to Exponor. In all, the complex, when completed, will have five residential buildings and three for offices and services.
