

CUF Descobertas Hospital

New building belonging to the private health care unit expands coverage and creates knowledge center

The expansion of the CUF Descobertas Hospital, located in Parque das Nações, expands the private health care unit's coverage, which now has an additional surface area of 22,000 square meters with a newly constructed building housing a wide range of consultations and examinations, an operating room and outpatient surgery center.

The new building also has a Knowledge Center, which demonstrates investment in research, teaching and medical training.

In all, the José de Mello Health Care Group hospital unit has 56,000 square meters, with 39,000 used for clinical activities and 17,000 for parking.

Engexpor oversaw project management and the health care unit expansion, ensuring compliance of hospital safety standards and guaranteeing the levels of comfort, quality and operability expected by clients from facilities of this nature.
