

Inapal Metal

Cutting edge image in installations with excellent infrastructures and tools

Strategically situated near Auto Europa, in the Palmela region, the industrial unit Inapal Metal – which dedicates itself to the production of structural metal plates components for the automobile industry – is made up of a social building and two production halls.

Made up of two floors, the administrative and technical building hosts offices, meeting rooms, cafeteria, sanitary installations, quality room, warehouse, compressor room, boiler room and technical area of hydraulic and mechanic installations.

The operation, which counted with the project management and construction by Engexpor, also finished the treatment of an area of approximately 8,000 m² of exterior spaces for access and garden areas.
