

Peugeot

Modern and functional installations in a strategic localization

Situated in an industrial center of reference in Grande Lisboa, in Alfragide, the commercial unit of Peugeot distinguishes itself by the modern architecture and by the best and more advanced technological resources.

Engexpor undertook the project management and the construction of these installations which enclose exhibition spaces, reserved areas for selling and after-sales, automobile reparations and maintenance, in a modern, functional and equipped structure with comfort for the clients and collaborators.

Nowadays, the installations are occupied by PSA Retail Portugal, which encloses the French brands Peugeot, Citroën and DS Automobiles.
