

Quelhas 28

Condominium creating lively spaces throughout the block

In the heart of Lapa is located the closed condominium Quelhas 28, a prestigious reference in this noble area of Lisbon.

With a project signed by the architect Gonçalo Byrne, the condominium stands out for its modern architecture in a traditional neighborhood, paying special attention to its green spaces and to the surroundings of the whole enterprise, which was in charge of the landscape architects João Nunes and Carlos Ribas. The intervention in the landscape, consisting of adjacent squares at different levels, was often done through stairs with central handrails, accompanied by flowerbeds and benches, recovering the traditional form of connection between gaps in the city of Lisbon.

With security 24/7, there is also a supermarket inside the condominium.

Engexpor was in charge of the project and construction management of this residential building, segment where our experience is vast and diversified.
