

Sonae Group

A renowned multinational that manages a business portfolio in areas as diverse as retail, financial services, technology, shopping centers and telecommunications, the Sonae Group is one of our main clients, with which we have a longstanding relationship.

Besides Sonae Sierra – owner of 46 shopping centers in Europe and South America – with which we have developed this kind of venture in various countries, we also work with other companies in the group. An example is Sonae MC, the leading company in the Portuguese food retail market, for which we carried out the project and works management on diverse retail stores under different brands. Among these are the Continente hypermarkets and the Continente Modelo and Continente Bom Dia supermarkets. We have worked with the Big Shop and Bonjour brands in Brazil.

We also collaborated with Sonae Sierra – responsible for the retail operations specializing in sports and clothing – on project and construction management for some of the famous Zippy brand stores.
